

4th European Conference on e-Public Procurement

SPANISH VERSION OF EVENT - How to contract complex and technological services? - AN UNIQUE OPPORTUNITY FOR EXPERTS AND PROFESSIONALS ON TECHNOLOGY AND ON PUBLIC AND PRIVATE MARKETS! MADRID – 13 May 2019 - Meliá Aeropuerto Barajas - Av. de Logroño, 305, 28042 Madrid, Spain Organized by OPET - Portuguese Engineering and Technology Foresight Observatory And by APMEP - Portuguese Association of Public Markets

1. OBJECTIVE This is the 4th European Conference on E-PUBLIC PROCUREMENT organized by OPET and the three previous conferences were organized in Barcelona, Lisbon and Porto focusing the preparation and implementation of the new EU Directives on Public Procurement approved on 2014(2014/23/EU, 2014/24/EU, 2014/25/EU). The main results of these successful conferences were published through Amazon (click to visit: E-Public Procurement in Europe : Public Management, Technologies and Processes of Change, and New Developments on E Public Procurement), besides supporting the implementation of e-procurement in several member states and having been the birthplace of the new European Association of Electronic Platforms, EUPLAT(www.euplat.org). These Directives were transposed by EU member States and major challenges stem from contracting complex and technological services using multi-attribute award criteria and performance requirements, or performance based contracting, because most traditional rules and procedures have been designed to contract public works or standardized goods using the award criterion of minimal price. Similar developments are happening in private markets to buy and to sell technologic and complex services.

However, this is the fastest growing business within European public markets with an annual growth rate higher than 10 %, and accounting now for more than 6% of EU GDP, explaining why discussing and proposing better approaches and solutions for this type of public procurement has a vital importance for most public authorities and corporations in Complex and Technological Services. This conference is also devoted to discuss best practices from private sectors which can help to improve the contracts of technological services.

This Conference will be particularly dedicated to professionals and experts on technology services using new tools of Digital Economy and innovative approaches to achieve the best results.

Best Practices from several sectors are discussed and General Recommendations will be discussed helping buyers to contract better and economic operators to increase better success.

The event will include a WORKSHOP devoted to a debate (round table) between public buyers and sellers as well as the presentation of the Agency for Digital Administration of Madrid's Annual Procurement Plans.

2. CHAIRMAN, PUBLICATIONS AND LANGUAGES Conference Chairman: Professor Luís Valadares Tavares – OPET and University of Lisbon

A selection of papers presented in the conference will be published after a review by the peers of the EUROPEAN JOURNAL OF PUBLIC PROCUREMENT MARKETS (<https://eupublicmarkets.com/>).

Conference working languages: English and Spanish (no translation available)
